Government has also approved building a buffer stock of pulses up to 20 lakh tonnes through domestic procurement and import of 10 lakh tons each. The operational buffer of 6.38 lakh tonnes of pulses has been built through procurement and import contacts.

These norms are maintained for the Central Pool without any State-wise bifurcation. No allocation towards 'buffer stock' is made to

any of the States. However, in order to ensure smooth supply of foodgrains, stocks are moved from surplus State to deficient States.

(d): Funds earmarked for the said purpose during the last three years are as under-
